SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable extinguishing media:	Foam, dry powder, carbon dioxide, sand, water mist. Neighbouring fires (containers exposed to fire): Water spray or fog.
Unsuitable extinguishing media:	Direct water jet.

5.2 Special hazards arising from the substance/mixture

Avoid breathing combustion products. The product is combustible and, when dusts are dispersed in air in sufficient concentrations and in the presence of an ignition source, may produce explosive mixtures with air. Fire may develop or be fuelled by the solid, possibly dripping from the container, when it reaches high temperatures or by contact with ignition sources.

5.3 Advice for firefighters

Surrounding fires:	Cool containers with water to prevent decomposition of product and development of potential health hazards. Always use full fire protection. Collect water from which must not enter sewage system. Dispose of contaminated water used for extinguishing and residues in accordance with current regulations.
Protection against fire:	Helmet with visor, flame retardant clothing (jacket and trousers with straps around the arms, legs and waist, EN 469), gloves (fireproof and dielectric, EN 659), a mask with face mask covering the whole face of the operator or the car (self protective) in case of large amounts of smoke, a self-contained breathing apparatus (EN 137).
Hazardous combustion products:	Not available.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

See subsection 6.3.

For emergency responders

See subsection 6.3.

6.2 Environmental precautions

Prevent further leakage or spillage if this can be done safely.
Do not allow product to enter sewage system.

6.3 Methods and material for containment and cleaning up

Mechanically scoop up spilled product and place in containers for recovery or disposal. Remove residue with water spray if there are no contraindications.

Ensure adequate ventilation of the area affected by the spillage. Check for possible incompatibilities for the material in section 7. Disposal of contaminated material should be in accordance with the provisions of section 13.

6.4 Reference to other sections

For exposure control and personal protective measures, see section 8.
For waste disposal, follow the recommendations in section 13.

Precautions for safe handling:	Avoid formation of dust and aerosols. Avoid exposure - obtain special instructions before use. Normal fire prevention precautions. Avoid electrostatic charge build-up.
Personal protection:	Not available.
Technical protective measures:	Adequate extraction should be provided where dust is formed.
Handling:	Not available.

7.2 Conditions for safe storage, including any incompatibilities

Storage:	Store only in the original container.
Conditions for safe storage, including any incompatibilities:	Store closed containers in a well-ventilated area. Keep containers away from incompatible materials, see section 10.
Storage – away from:	Store out of direct sunlight. Keep containers away from incompatible materials, see section 10.

7.3 Specific end use(s)

Active Pharmaceutical Ingredient or Excipient

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

Not available.

8.2 Exposure controls

Appropriate engineering control

Since the use of appropriate technical measures should always take precedence over personal protective equipment, ensure good ventilation at the workplace by effective local suction. When choosing personal protective equipment, ask your chemical suppliers if this is necessary. Personal protective equipment must be CE-marked for compliance with applicable regulations. Provide an emergency shower with a viscoelastic tray.

Hygiene measures: Handle with appropriate industrial hygiene precautions, and observe safety practices. Wash hands before breaks and after finishing work.

Individual protection measures

Eye/face protection:	Protective face shields and safety goggles according to EN166.
Skin protection:	Choose body protection according to the quantity and concentration of the hazardous substance in the workplace.
Hand protection:	Handle with gloves. The selected protective gloves must comply with the specifications of EU Directive 89/686/EEC and the derived EN 374 standard.
Respiratory protection:	Where risk assessment shows that air-purifying respirators are appropriate, use dust mask type N95 (USA) or type P1 (EN 143). Use respirators and components tested and approved under appropriate governmental standards such as NIOSH (US) or CEN (EU).
Thermal hazards:	Not determined.

Environmental exposure control

Not available.
